

# KEEP IN MIND THE 3Rs

01

## REDUCE

Think before you buy! Say no to single-use items like plastic or paper cups, gift wraps, and heavily packaged products. Always carry your own shopping bag and water bottle to avoid plastic ones. Reducing the waste at source is the key to solving the waste crisis.

02

## REUSE

Give things a second chance. Use old jars and bags again. Revive your wardrobe and gadgets by fixing them up—let's keep them out of the trash.

03

## RECYCLE

Recycling is energy and capital intensive, but it's a better option than letting valuable materials go to landfills. When we recycle, we save materials that would have otherwise ended up in a landfill causing severe adverse effects on the environment.

Always Segregate your Waste into Wet, Dry, and Reject and be a responsible citizen.
